

BRADEN SCALE FOR PRESSURE INJURY RISK

Predictive Risk Assessment of Pressure Ulcers/Injuries in Adults

1. PATIENT IDENTIFICATION

Patient Name: _____

Age / DOB: ____/____/____

MRN / ID: _____

Unit / Ward / Bed: _____

Surgery / Diagnosis: _____

Date / Time: ____/____/____ : ____

BRADEN RISK SUBSCALES

Clinical Parameter	Options & Scoring Criteria	Score
1. Sensory Perception Ability to respond meaningfully to pressure discomfort	☐ Completely limited: Unresponsive to painful stimuli (1) ☐ Very limited: Responds only to painful stimuli (2) ☐ Slightly limited: Responds to verbal commands, has sensory deficit (3) ☐ No impairment: Responds fully to verbal commands, intact sensation (4)	[]
2. Moisture Degree to which skin is exposed to moisture	☐ Constantly moist: Skin kept moist constantly by perspiration/urine (1) ☐ Very moist: Linen must be changed at least once a shift (2) ☐ Occasionally moist: Extra linen change required roughly once a day (3) ☐ Rarely moist: Skin usually dry, routine diaper/linen changes only (4)	[]
3. Activity Degree of physical activity	☐ Bedfast: Confined to bed continuously (1) ☐ Chairfast: Ability to walk severely limited or non-existent, chairbound (2) ☐ Walks occasionally: Walks short distances during day with or without help (3) ☐ Walks frequently: Walks outside room at least twice a day (4)	[]
4. Mobility Ability to change and control body position	☐ Completely immobile: Does not make even slight changes in body position (1) ☐ Very limited: Makes occasional slight changes in body position (2) ☐ Slightly limited: Makes frequent slight changes independently (3) ☐ No limitation: Makes major and frequent changes in position without help (4)	[]
5. Nutrition Usual food intake pattern	☐ Very poor: Never eats a complete meal, drinks little fluid, NPO >5 days (1) ☐ Probably inadequate: Rarely eats a complete meal, receives less than optimum (2) ☐ Adequate: Eats over half of most meals, takes supplements if needed (3) ☐ Excellent: Eats most of every meal, never refuses food, eats between meals (4)	[]
6. Friction & Shear Friction with linens and slide in bed/chair	☐ Problem: Requires moderate to maximum assist in moving, sliding in bed (1) ☐ Potential problem: Moves feebly, requires minimal assist during move (2) ☐ No apparent problem: Moves in bed and in chair independently, good strength (3)	[]

TOTAL SCORE: [] POINTS (Maximum: 23 points)

Assessor (RN / License #): _____

CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Very High / High Risk (≤ 12 points)

Dynamic pressure-reducing mattress, q2h repositioning, barrier cream, dietitian consult.

Moderate Risk (13 - 14 points)

Static foam overlay, q2h turning schedule, heel elevation, moisture management.

Mild / Low Risk (15 - 18 points)

Regular turning protocol, skin moisturization, encourage mobilization.

No Risk (19 - 23 points)

Routine nursing care, environmental surveillance, reevaluate weekly.

Registered Nurse (RN) Signature & Professional Stamp
