

SVS WIFI CLASSIFICATION SYSTEM

Threatened Lower Limb Risk Assessment (Wound, Ischemia, foot Infection)

1. PATIENT IDENTIFICATION

Patient Name: _____

Unit / Ward / Bed: _____

Age / DOB: ____/____/____

Surgery / Diagnosis: _____

MRN / ID: _____

Date / Time: ____/____/____ : ____

WIFI THREE CLINICAL DOMAINS

Clinical Parameter	Options & Scoring Criteria	Score
W - Wound Depth & Extent Clinical ulceration and gangrene	☐ 0: No ulcer (ischemic rest pain only), no gangrene (0) ☐ 1: Small shallow ulcer on distal leg or foot; no gangrene (1) ☐ 2: Deep ulcer with exposed tendon, joint, or bone; gangrene limited to digits (2) ☐ 3: Extensive deep ulcer involving heel/hindfoot; extensive gangrene (3)	[]
I - Ischemia (Hemodynamics) Ankle-Brachial Index (ABI) or Toe Pressure (TP)	☐ 0: ABI ≥ 0.80 / Ankle Press > 100 mmHg / Toe Press ≥ 60 mmHg (0) ☐ 1: ABI 0.60 - 0.79 / AP 70-100 mmHg / TP 40-59 mmHg (1) ☐ 2: ABI 0.40 - 0.59 / AP 50-70 mmHg / TP 30-39 mmHg (2) ☐ 3: ABI < 0.40 / AP < 50 mmHg / TP < 30 mmHg (3)	[]
fi - foot Infection Severity Infection signs, erythema, systemic toxicity	☐ 0: Uninfected: No purulence or manifestations of inflammation (0) ☐ 1: Mild: ≥ 2 local signs; erythema ≤ 2 cm around ulcer; superficial (1) ☐ 2: Moderate: Erythema > 2 cm; deeper tissues involved; no SIRS (2) ☐ 3: Severe: Systemic inflammatory response syndrome (SIRS) present (3)	[]

TOTAL SCORE: [] POINTS (Maximum: W (0-3), I (0-3), fi (0-3)) **Assessor (RN / License #):** _____

CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Stage 1 - Very Low Amputation Risk (W0-1, I0, fi0)

Wound care, glycemic control, pressure offloading.
Revascularization not indicated.

Stage 2 - Low Amputation Risk (W1-2, I0-1, fi0-1)

Local debridement, antibiotic therapy, consider non-invasive vascular studies.

Stage 3 - Moderate Amputation Risk (W2-3, I1-2, fi1-2)

Vascular surgery consult for revascularization, IV antibiotics, urgent debridement.

Stage 4 - High Amputation Risk (Severe I3 / fi3 / W3)

High risk of major limb loss.
Urgent revascularization and radical surgical debridement.
