

FOUR SCORE (COMA SCALE)

Full Outline of UnResponsiveness Coma Assessment in ICU

1. PATIENT IDENTIFICATION

Patient Name: _____

Unit / Ward / Bed: _____

Age / DOB: ____/____/____

Surgery / Diagnosis: _____

MRN / ID: _____

Date / Time: ____/____/____ : ____

FOUR CLINICAL DOMAINS

Clinical Parameter	Options & Scoring Criteria	Score
1. Eye Response (E) Eyelid opening and tracking	☐ Eyelids open/tracked (4) ☐ Eyelids open to loud voice (3) ☐ Eyelids open to pain (2) ☐ Eyelids closed to pain (1) ☐ No response to pain (0)	[]
2. Motor Response (M) Command following and posturing	☐ Thumbs-up, fist, peace sign (4) ☐ Localizing to pain (3) ☐ Flexion response to pain (2) ☐ Extensor posturing (1) ☐ No response / Myoclonus (0)	[]
3. Brainstem Reflexes (B) Pupillary and corneal integrity	☐ Pupil and corneal reflexes present (4) ☐ One pupil wide and fixed (3) ☐ Pupil or corneal absent (2) ☐ Both absent (1) ☐ Absent pupil, corneal, cough (0)	[]
4. Respiration (R) Ventilatory drive and pattern	☐ Regular breathing pattern (4) ☐ Cheyne-Stokes breathing (3) ☐ Breathes above vent rate (2) ☐ Breathes at vent rate (1) ☐ Apnea / On ventilator (0)	[]

TOTAL SCORE: [] POINTS (Maximum: 16 points (0 to 16))

Assessor (RN / License #): _____

CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Mild Impairment (13 - 16 points)

Favorable prognosis, high likelihood of consciousness recovery.

Moderate Impairment (9 - 12 points)

Close neurological surveillance in ICU, protect airway.

Severe Coma (≤ 8 points)

Severe brain injury, high mortality risk. Intubation, neurocritical care.

Registered Nurse (RN) Signature & Professional Stamp

Date & Time of Assessment
