

HUMPTY DUMPTY PEDIATRIC FALL RISK SCALE

Pediatric Inpatient Fall Risk Assessment and Prevention Protocol

1. PATIENT IDENTIFICATION

Patient Name: _____

Unit / Ward / Bed: _____

Age / DOB: ____/____/____

Surgery / Diagnosis: _____

MRN / ID: _____

Date / Time: ____/____/____ : ____

SEVEN PEDIATRIC RISK DOMAINS

Clinical Parameter	Options & Scoring Criteria	Score
1. Age Category Developmental stage	☐ ≥ 13 years old (1) ☐ 7 - 12 years old (2) ☐ 3 - 6 years old (3) ☐ < 3 years old (4)	[]
2. Gender Statistical pediatric risk	☐ Female (1) ☐ Male (2)	[]
3. Diagnosis Clinical medical reason for admission	☐ Other medical diagnosis (1) ☐ Psychiatric / Behavioral disorder (2) ☐ Respiratory condition / Dehydration (3) ☐ Neurological condition / Seizure disorder (4)	[]
4. Cognitive Impairments Awareness of physical limits	☐ Aware of own limitations (1) ☐ Forgets limitations intermittently (2) ☐ Completely unaware of limitations / Impulsive (3)	[]
5. Environmental Factors Patient physical setting	☐ Outpatient clinic area (1) ☐ Bed patient in standard hospital room (2) ☐ Infant / Toddler placed in crib (3) ☐ History of falls during admission / Multiple lines (4)	[]
6. Surgery / Sedation Time elapsed since procedure	☐ None / More than 48 hours ago (1) ☐ Within 48 hours (2) ☐ Within 24 hours of general anesthesia (3)	[]
7. Medication Regimen Prescription of sedating drugs	☐ Other medications / No medications (1) ☐ One high-fall risk medication (2) ☐ Multiple high-fall risk medications (sedatives, narcotics, laxatives) (3)	[]

TOTAL SCORE: [] POINTS (Maximum: 26 points (7 to 26))

Assessor (RN / License #): _____

CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Low Fall Risk (7 - 11 points)

Universal pediatric precautions, crib rails up x4, education of parents.

High Fall Risk (≥ 12 points)

High-risk fall protocol: Humpty sticker on crib, non-skid socks, direct supervision.

Registered Nurse (RN) Signature & Professional Stamp
