

RANCHO LOS AMIGOS LEVELS (RLAS)

Assessment of Cognitive Recovery following Traumatic Brain Injury

1. PATIENT IDENTIFICATION

Patient Name: _____

Age / DOB: ____/____/____

MRN / ID: _____

Unit / Ward / Bed: _____

Surgery / Diagnosis: _____

Date / Time: ____/____/____ : ____

EIGHT LEVELS OF COGNITIVE FUNCTIONING

Clinical Parameter	Options & Scoring Criteria	Score
Level I: No Response Coma / total assistance	☐ Completely unresponsive to visual, auditory, or painful stimuli. Appears deeply asleep.	(1) []
Level II: Generalized Response Reflex / total assistance	☐ Non-specific, inconsistent, non-purposeful reflex response to painful stimuli (sweating, groaning, posturing).	(2) []
Level III: Localized Response Specific / total assistance	☐ Blinks to light, turns toward sound, focuses on object, pulls at endotracheal tube/restraints inconsistently.	(3) []
Level IV: Confused-Agitated Alert / maximal assistance	☐ Heightened state of activity, bizarre non-purposeful behavior, cries, aggressive, lacks short-term recall.	(4) []
Level V: Confused-Inappropriate Non-agitated / max assist	☐ Alert, responds to simple commands, highly distractible, wanders, severe memory impairment, inappropriate verbal.	(5) []
Level VI: Confused-Appropriate Goal-directed / mod assist	☐ Inconsistently oriented to time/place, shows carry-over for relearned tasks, needs cues for structure.	(6) []
Level VII: Automatic-Appropriate Robot-like / min assist	☐ Appropriate and oriented in hospital/home, robot-like daily routine, superficial awareness, impaired judgment.	(7) []
Level VIII: Purposeful-Appropriate Autonomous / stand-by	☐ Consistently oriented, recalls past and recent events, integrates changes, autonomous with assistive devices.	(8) []

TOTAL SCORE: [] POINTS (Maximum: Levels I to VIII (1 to 8))
Assessor (RN / License #): _____

CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Severe Coma (Levels I-III) (Levels 1 - 3)

Total assistance. Prevent contractures, skin breakdown, sensory stimulation protocol.

Confused Agitated (Levels IV-V) (Levels 4 - 5)

Maximal assist. Low-stimulation environment, 1:1 safety supervision, bed enclosure.

Reintegrating (Levels VI-VIII) (Levels 6 - 8)

Mod to min assist. Structured routine, cognitive rehabilitation, family teaching.

Registered Nurse (RN) Signature & Professional Stamp
