CLINICAL INTERPRETATION & RECOMMENDED NURSING ACTIONS

Low Severity / High Healing (0 - 2 points)

Wound care, offloading footwear, strict glycemic control. Favorable healing.

Moderate Ulcer Severity (3 - 4 points)

Specialized wound care team, culture-directed antibiotics, vascular non-invasive studies.

Severe Ulcer / Amputation Risk (5 - 6 points)

High risk of major amputation. Urgent vascular consult, surgical debridement, IV antibiotics.
